

HecNet – our payment solution for your charging infrastructure

HecNet enables secure, fast, and fully automated payment. Our payment solution allows you to accept all common payment methods 24/7 and ensures rapid settlement to your account.

Self-service terminals differ from attended terminals in their range of functions. Via our HecNet connection, the self-service terminal independently handles authorization, payment processing, and communication with the cardholder.

The terminal first performs a pre-authorization for a predefined amount and enables the charging station. Once the charging process is complete, the actual charging amount is billed.

Your benefits

- ✓ **Transparent and reliable payment processing at the payment terminal**
- ✓ **Personal service and individual consultation**
- ✓ **Reliable support hotline**
- ✓ **Attractive and transparent terms**
- ✓ **Certified terminals with state-of-the-art encryption technology**
