

# HecNet – our payment solution for your parking machines

HecNet enables secure, fast, and user-friendly payment directly at the parking terminal. Our payment solution allows you to accept all common payment methods 24/7 and ensures rapid settlement to your account.

Self-service terminals differ from attended terminals in their range of functions. Via our HecNet connection, the parking machine or self-service terminal independently handles authorization, payment processing, and communication with the cardholder.

In a few simple steps, users select their parking duration and pay conveniently and cashless.
