

## Manage

# HecPoll – Your Control Centre for Reliable Filling Station Management.

The platform-independent and web-based management software HecPoll transfers the data of tank contents and fuel terminals into the office: this allows you to monitor transactions and fill levels, manage master data managed and generate analysis reports. With HecPoll, you have a tool that supports you in optimizing processes and managing results-oriented filling stations.

Whether in your data centre as a purchase licence or in our cloud as a rental licence, the intuitive user interface makes getting started with our software as easy as possible. After a brief introduction you can enter, process and evaluate data yourself. And if you opt for our cloud solution, all you need is a laptop – we'll take care of the rest.

### OnPremise – OnPremise - purchase licence for use on own server or cloud

- Higher one-off cost
- Internal hardware & software costs
- Requires trained staff
- Own responsibility for software and data

### Scope of Functions

- ✓ **Master Data Management:** Personnel, cost centres, customer cards, vehicles and products
- ✓ **Parameter Administration:** Station management, prices, fuel depots, tank data and reports
- ✓ **Installation:** Integration into existing network or as SaaS solution
- ✓ **Interfaces to Third-Party Systems:** Automated based on WebAPI or individual interfaces to third-party systems such as SAP or Microsoft Dynamics
- ✓ **Online Authorization:** With blacklist, whitelist and limit management, product restrictions in real time – for fleet and station cards

### Software as a Service (SaaS) – Rental License for at least 24 Months in the Hectronic Cloud

- ✓ Scalable - from a single filling station to a network of filling stations
- ✓ Low investment costs (monthly lump sum)
- ✓ Includes all modules and functions
- ✓ Requires only one device (PC/notebook/tablet) and an internet connection
- ✓ No third-party software maintenance
- ✓ No additional hardware required
- ✓ No server maintenance
- ✓ No IT staff required
- ✓ Regular database backups
- ✓ ISO-27001/991/14001 certified data centre
